and Integrative Genomics

and **G·A·B·B·A**
joint event

Workshop on Gene Expression: From Genes to Systems

April 15th, 2009

Faculty of Sciences of Lisbon, C2.2.12

Programme

9:00

Opening

9:30

Determinants of tissue-specific transcriptional regulation in a transplanted chromosome.

Nuno L. Barbosa-Morais, Department of Oncology, University of Cambridge, UK

10:15

Playing polo: a role for polyadenylation in development.

Alexandra Moreira, IBMC, Porto, Portugal

Coffee-break

11:30

Alternative splicing in neuronal function and dysfunction.

Jernej Ule, MRC Laboratory of Molecular Biology, Cambridge, UK

12:15

RNA-protein interactions in mRNA metabolism.

Margarida Gama-Carvalho, BioFIG, University of Lisbon, Portugal

Lunch

14:30

RNAi-based dissection of Innate Immune Responses.

Luis Ferreira Moita, Institute of Molecular Medicine, Lisbon, Portugal

15:15

Translational control of X chromosome dosage compensation in Drosophila.

Fatima Gebauer, Center for Genomic Regulation (CRG), Barcelona, Spain

Coffee-break

16:30

Small RNA pathways in germ cells.

René Ketting, Hubrecht Institute, The Netherlands

17:15

MicroRNA-based diagnostic tools for cancer.

Nitzan Rosenfeld, Rosetta Genomics, Israel

18:00

Closing

Registration:

By email to: rvincent@fc.ul.pt

Deadline: April 3rd Registration fee 25€ includes coffee-breaks, lunch and materials participant number limited to available seats

Sponsors

Organization:

Margarida Gama-Carvalho

BioFIG, UL
