# Stroke, Molecular Neuropathology and Neurorecovery

2<sup>nd</sup> JUNE 2011

## PROGRAMME

**10.30h-11.30h**

### “Significance of microglial tumor necrosis factor signaling for ischemic brain damage”

Kate Lykke Lambertsen, University of Southern Denmark, Denmark

**11.30h-12.30h**

### “Recovery after stroke the new venue for research and treatment”

Tadeusz Wieloch, Lund University, Sweden

### *Lunch Break*

**14.30h-15.30h**

### “Epidemiology of Stroke and TIA in northern Portugal: data from a community-base population study”

Manuel Correia, Hospital Geral de Santo António, Portugal

**15.30h-16.30h**

### “The hepatic response to acute brain injury”

Daniel Anthony, University of Oxford, United Kingdom

### *Coffee Break*

**17.00h-18.00h**

### “Systemic effects of stroke as target for brain protection”

Ulrich Dirnagl, Charité University Medicine, Germany

Institute for Molecular and Cell Biology, IBMC main auditorium,  
Porto, Portugal | 2<sup>nd</sup> June 2011
